

Cosy app

Quick reference guide

About the Cosy app

Control your heating and hot water from anywhere with your smartphone, tablet or desktop computer using the Cosy app. Whether you're coming home early or staying out late - use the Cosy app to take control and make your home work perfectly for you and those you live with.

What can it do?

Here are just a few of the features available from the Cosy app:

- **Extra control**
The app gives you more control options including delayed start and extended mode durations.
- **Temperatures**
Adjust the temperatures for the heating modes to suit your requirements.
- **Schedules**
Simple to set up, you can create unique heating profiles for Cosy to automatically control the heating and hot water when you're busy doing other things.

Install the app

Android and Apple iOS users

Android and iOS users can download the Cosy app for free from Google Play and the Apple App Store.

Other devices

Users of other mobile devices, tablets or laptop and desktop computers can use the web app:

FAQs

Do I need to use the Cosy app?

The Cosy app (or web app) is required to set up temperatures and schedules on your Cosy system.

Does the app use my broadband?

The app connects to your Cosy system via the hub. It requires an active broadband connection.

Can anyone control my heating?

We take security seriously. Before anyone can use the app to control a Cosy system they need to go through a registration process that requires them to be able to press a button on the hub.

Each person in your home can use the Cosy app and use it to control the heating and hot water.
